

DLS Flatsub Stereo-One

Flatsub - "all in one"

DLS Flatsub Stereo-One is an active subwoofer with a built-in class D power amplifier for the subwoofer and a stereo amplifier for a pair of Flatbox stereo speakers. The Flatsub Stereo-One with a specially developed, 7", long-stroke woofer with a powerful magnetic system combined and a passive radiator for improved bass sound.

The subwoofer allows great freedom in placement. With the controls you can adjust level for front system, level for subwoofer, crossover frequency and Bass EQ, which makes it easy to adjust for the acoustics in your listening room.
